Summary

Full Stack Developer with practical experience designing and developing full-stack web applications and delivering complete software projects. Proficient in modern web technologies with a strong foundation in frontend, backend, and database development. Experienced in developing intelligent applications using Machine Learning, Deep Learning, and Computer Vision, with hands-on experience building real-time detection systems.

Education

Bachelor of Science in Computer Science

Expected Graduation: 2027

University of Engineering and Technology (UET) Lahore

Work Experience

Full Stack Developer

Mar 2026 – Present

UNISON – Alumni Network Platform | unison-lovat.vercel.app UET Faisalabad, Computer Science Department

Designed and developed a full-stack alumni networking platform for the Computer Science Department, UET Faisalabad, in a team of three. Implemented JWT authentication, OTP verification, role-based access control, real-time messaging and notifications with Socket.io, and graph-based networking features using MongoDB and Neo4j, including user connections, recommendations, and analytics.

Projects

Cloud Image Handling System | *React, Express, MongoDB, REST APIs, Cloudinary* | github.com/ZainUlAbideen-01/Cloud-Image-Handler

Built a full-stack cloud image management platform with end-to-end upload, storage, and retrieval pipelines, featuring a responsive React frontend and a RESTful Express/MongoDB backend.

ZMovies | *React, TMDB API* | github.com/ZainUlAbideen-01/ZMovies | zmovies826.netlify.app/

Generated a dynamic movie discovery app powered by the TMDB API, with real-time search, genre-based listing, and a clean, responsive UI for browsing thousands of movies.

Sushi-Themed Restaurant Website | *Tailwind CSS, Animate-On-Scroll* | github.com/ZainUlAbideen-01/Sushi-Themed-Website | sushistore826.netlify.app/

A visually polished, fully responsive restaurant landing page made with Tailwind CSS, and scroll animations via animate on scroll, emphasizing modern layout and clean typography.

Gym Fitness Tracker | *Python, Computer Vision, MediaPipe-Hands, MediaPipe-Pose* | github.com/ZainUlAbideen-01/AI-Based-Gym-Fitness-Tracker

Built an AI-powered workout tracker that uses computer vision and MediaPipe's Hand to select exercise by pointing on screen and MediaPipe's Pose estimation to detect body landmarks, track exercise form, and count repetitions in real time via webcam.

Pneumonia Detection System | *Python, ResNet-18* | github.com/ZainUlAbideen-01/Pneumonia-Detection-System-using-Deep-Learning

Fine-tuned a ResNet-18 convolutional neural network on labeled chest X-ray datasets to classify pneumonia cases with high diagnostic accuracy, demonstrating applied deep learning in a medical imaging context.

Technical Skills

Web Technologies

HTML, CSS, Tailwind CSS, JavaScript, TypeScript, React, Next.js

Backend

Node.js, Express.js, Nest.js

Databases

MongoDB, SQL, Neo4j

Languages

JavaScript, TypeScript, Python, C++, C#

Frameworks / SDKs

.NET, React

AI / ML

Computer Vision, Deep Learning, Model Training

Other

Git, Github, Netlify, Object-Oriented Programming, REST APIs
